Subject Index of Volume 44

Anodic polymerization
oleum as electrolyte of, of benzene, 107

BEDT-TTF salts
CH_2 vibrations in radical cation salts based on donor BEDT-TTF, 227
physical and structural properties of new organic conductor (BEDT-TTF)$_4$Cu(C_2O_4)$_2$, 147
Benzene
electropolymerization in Bu_4NBF_4–oleum–CH_2Cl_2 system, 133
oleum as electrolyte of anodic polymerization of benzene, 107

Carbon powders
preparation, by pyrolysis of cyclodecane under vacuum and their magnetic properties, 357
Charge transfer
optical beam deflection study of ionic movements during, of polyaniline and poly(alkylanilines) in NH_4F; 2.3HF medium, 349
Chemical synthesis
of transparent and conducting polyaniline–poly(ethylene terephthalate) composite films, 143
CH_2 vibrations
in radical cation salts based on donor BEDT-TTF, 227
Conducting polymer(s)
slow relaxation in; case of poly(3-methylthiophene), 177
solution processing of doped, 341
Conduction mechanism
a.c., of polyacenic semiconductive materials, 35
Conductivity
influence of uniaxial pressure on, of polydiphenylenephthalide, 111
thermoelectric power and, of alkali metal-doped bulk fullerenes, K_xC_{60} and Na_xC_{60}, 363

Copper
physical and structural properties of new organic conductor (BEDT-TTF)$_4$Cu(C_2O_4)$_2$, 147
Cyclodecane
preparation of carbon powders by pyrolysis of, under vacuum and their magnetic properties, 357

Diatomic polymers
electron–electron interaction effects on excitations of, 219
Dielectric properties
of poly(3-n-hexylthiophene) powder, 327
Diphenylcarbene polymer
theoretical study on ferromagnetic interaction in stacked, 1

Electrical conduction
in polyparaphenylene thin films prepared from precursor polymer, 45
Electric field
mutual influence of uniaxial pressure and, on electronic instabilities in polydiphenylenephthalide, 99
Electrochemical adsorption
of hydrogen and various ions on polyaniline film; reactions concerning first pair of cyclic voltammetric peaks, 189
Electrochemical properties
of poly(2-chloroaniline), 271
Electrochemical study
of poly(3-octylthiophene) film electrodes
electrolyte effects on voltammetric characteristics of polymer; three states of polymer film, 9
reversible redox/conductivity state switching; impedance study, 21
Electrochemistry
of polyaniline in ambient-temperature molten salts, 307
Electron–electron interaction effects
on excitations of diatomic polymers, 219

1991 — Elsevier Sequoia, Lausanne

Electronic instabilities
mutual influence of uniaxial pressure and electric field on, of polydiphenylenephthalide, 99
Electronic properties
of junctions between polypyrrole–poly(ethylene terephthalate) composites and metals, 159
Electropolymerization
benzene, in Bu_4NBF_4–oleum–CH_2Cl_2 system, 133
of methoxyaniline; experimental results and frontier orbital interpretation, 117
Electrolyte
oleum as, of anodic polymerization of benzene, 107
Electrolyte effects
on voltammetric characteristics of polymer; three states of polymer film; electrochemical study of poly(3-octylthiophene) film electrodes, 9
Excitations
of diatomic polymers, electron–electron interaction effects on, 219

Ferromagnetic interaction
in stacked diphenylcarbene polymer, theoretical study on, 1
Fluorides
^{19}F NMR study of graphite fluorides prepared at room temperature, 75
Fullerenes
thermoelectric power and conductivity of alkali metal-doped bulk, K_XC_{60} and Na_XC_{60}, 363

Graphite
^{19}F NMR study of graphite fluorides prepared at room temperature, 75
intercalation of $FeCl_3$ into graphite films in molten salts, 165
staging in electrochemical intercalation of Li into graphite from dimethyl sulfoxide solutions, 239

Hydrogen
electrochemical adsorption of, and various ions on polyaniline film; reactions concerning first pair of cyclic voltammetric peaks, 189

Infrared reflectivity spectra
of metal complex conductor [Pt(dddt)$_2$]$_2$IBr$_2$ (dddt = 5,6-dihydro-1,3-dithin-2,3-dithiolate), 213

Intercalation
of $FeCl_3$ into graphite films in molten salts, 165
staging in electrochemical, of Li into graphite from dimethyl sulfoxide solutions, 239
Ionic movements
optical beam deflection study of, during charge transfer of polyaniline and poly(alkylanilines) in NH_4F;2.3HF medium, 349
Iron
intercalation of $FeCl_3$ into graphite films in molten salts, 165

Lithium
staging in electrochemical intercalation of Li into graphite from dimethyl sulfoxide solutions, 239

Magnetic properties
preparation of carbon powders by pyrolysis of cyclodecane under vacuum and their, 357
Metal complex conductor
[Pt(dddt)$_2$]$_2$IBr$_2$ (dddt = 5,6-dihydro-1,3-dithin-2,3-dithiolate), IR reflectivity spectra of, 213
Metal–non-metal transition
in polyacetylene, 281
Methoxyaniline
electropolymerization of; experimental results and frontier orbital interpretation, 117
Mössbauer study
on I-doped poly(tetrathiafulvalenes), and Raman spectroscopy study, 55

NMR study
^{19}F, of graphite fluorides prepared at room temperature, 75

Oleum
benzene electropolymerization in Bu_4NBF_4–oleum–CH_2Cl_2 system, 133
as electrolyte of anodic polymerization of benzene, 107
Optical beam deflection study
of ionic movements during charge transfer of polyaniline and poly(alkylanilines) in NH_4F;2.3HF medium, 349
Organic conductor
physical and structural properties of new, (BEDT-TTF)$_4$Cu(C$_2$O$_4$)$_2$, 147

Oxidative doping
of PPV oligomers, 85
of PTV oligomers, 259

Physical and structural properties
of new organic conductor (BEDT-TTF)$_4$Cu(C_2O_4)$_2$, 147
Platinum
IR reflectivity spectra of metal complex conductor [Pt(dddt)$_2$]$_2$IBr$_2$ (dddt = 5,6-dihydro-1,3-dithin-2,3-dithiolate), 213
Polyacenic semiconductive materials
a.c. conduction mechanism of, 35
Polyacetylene
ab initio calculations of *trans*-polyacetylene clusters including Na counterions, 65
electrically conducting, copolymers, 95
metal–non-metal transition in, 281
Poly(alkylanilines)
optical beam deflection study of ionic movements during charge transfer of polyaniline and, in NH_4F;2.3HF medium, 349
Polyaniline
chemical synthesis of transparent and conducting polyaniline–poly(ethylene terephthalate) composite films, 143
electrochemical adsorption of hydrogen and various ions on, film; reactions concerning first pair of cyclic voltammetric peaks, 189
electrochemistry of, in ambient-temperature molten salts, 307
optical beam deflection study of ionic movements during charge transfer of, and poly(alkylanilines) in NH_4F; 2.3HF medium, 349
Poly(2-chloroaniline)
electrochemical properties of, 271
Polydiphenylenephthalide
influence of uniaxial pressure on conductivity of, 111
mutual influence of uniaxial pressure and electric field on electronic instabilities in, 99
Poly(ethylene terephthalate)
chemical synthesis of transparent and conducting polyaniline–poly(ethylene terephthalate) composite films, 143
electronic properties of junctions between polypyrrole–poly(ethylene terephthalate) composites and metals, 159
Poly(3-n-hexylthiophene)
powder, dielectric properties of, 327
Poly(3-methylthiophene)
slow relaxation in conducting polymers; case of, 177
Poly(3-octylthiophene)
electrochemical study of, film electrodes
electrolyte effects on voltammetric characteristics of polymer; three states of polymer film, 9
reversible redox/conductivity state switching; impedance study, 21
Polyparaphenylene
electrical conduction in, thin films prepared from precursor polymer, 45
Poly(*p*-phenylene)
Schottky device based on, 199
Poly(*p*-phenylene vinylene) oligomers
oxidative doping studies, 85
Polypyrrole
doped, study of, by spin probe method at 3 cm and 2 mm waveband EPR, 205
electronic properties of junctions between polypyrrole–poly(ethylene terephthalate) composites and metals, 159
Poly(*p*-terphenylenes)
synthesis of some disubstituted, 247
Poly(tetrathiafulvalenes)
Mössbauer and Raman spectroscopy studies on I-doped, 55
Poly(2,5-thienylene vinylene)
oxidative doping of PTV oligomers, 259
Polythiophene
and polythiophene-based conducting composites, 293
Potassium
thermoelectric power and conductivity of alkali metal-doped bulk fullerenes, K_xC_{60} and Na_xC_{60}, 363
Pressure
influence of uniaxial, on conductivity of polydiphenylenephthalide, 111
mutual influence of uniaxial, and electric field on electronic instabilities in polydiphenylenephthalide, 99
Pyrolysis
preparation of carbon powders by, of cyclodecane under vacuum and their magnetic properties, 357

Radical cation salts
CH_2 vibrations in, based on donor BEDT-TTF, 227
Raman spectra
of conductive salt $(TTF)_{18}(I_3)_{18}$-$(CH_2Cl_2)_2$, 321
Raman spectroscopy study
on I-doped poly(tetrathiafulvalenes), Mössbauer and, 55
Redox/conductivity state switching
reversible; impedance study; electrochemical study of poly(3-octylthiophene) film electrodes, 21

Schottky device
based on doped poly(*p*-phenylene), 199
Slow relaxation
in conducting polymers; case of poly(3-methylthiophene), 177
Sodium
ab initio calculations of *trans*-polyacetylene clusters including Na counterions, 65
thermoelectric power and conductivity of alkali metal-doped bulk fullerenes, K_XC_{60} and Na_XC_{60}, 363
Solution processing
of doped conducting polymer, 341
Spin probe method
study of doped polypyrrole by, at 3 cm and 2 mm waveband EPR, 205
Staging
in electrochemical intercalation of Li into graphite from dimethyl sulfoxide solutions, 239
Synthesis
of disubstituted poly(*p*-terphenylenes), 247

TCNQ salts
transversal tensity resistive effect in $TEA(TCNQ)_2$ crystals, 103
Theoretical study
on ferromagnetic interaction in stacked diphenylcarbene polymer, 1
Thermoelectric power
and conductivity of alkali metal-doped bulk fullerenes, K_XC_{60} and Na_XC_{60}, 363
Transversal tensity resistive effect
in $TEA(TCNQ)_2$ crystals, 103
TTF salts
Raman spectra of conductive salt $(TTF)_{18}(I_3)_{18}(CH_2Cl_2)_2$, 321

Voltammetric characteristics
electrolyte effects on, of polymer; three states of polymer film; electrochemical study of poly(3-octylthiophene) film electrodes, 9
